OPTIONS

Introduction to the series of optional items
for compact type embroidery machine NEOII

Combination of 7 kinds of frames with 3 types of devices will help you create your own original embroidery.

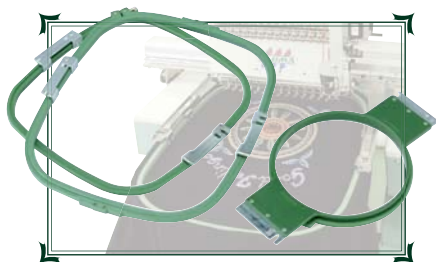

WIDE, WIDER, WIDEST!

Still wider embroidery, using wider Border frame!

X-axis EXTENSION UNIT

This unit permits to expand the embroidery space by 700mm in right and left direction from the standard embroidery space of 360mm (D) x 500mm (W) to 360mm (D) x 1,200mm (W). You can embroider the full embroidery field with larger size designs or repeat many small designs the applications depend on you.

Frames

All-rounder frame for versatile applications

Tubular Frame

A Wide range of tubular frames is available to meet all your requirements for embroidery on T-shirts, sweat shirts or other items.

Dress up your caps with embroidery!

Cap Frame

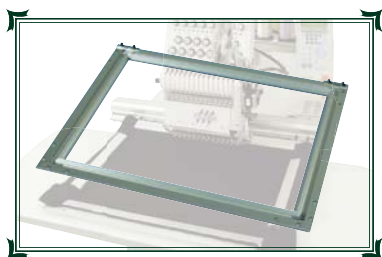

Embroider the caps on the circumference up to 360mm in length. 2 types of adult or child-use are available for wide cap frames.

Applicable on thin and narrow products, too

Cylindrical Frame

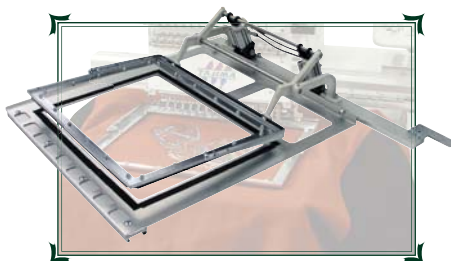

A wide range of embroidery can be applied to cylinder-shaped products like socks, gloves, wristbands and golf head covers.

Basic embroidery frame

Border Frame

Allows you to embroider badges or flat work pieces for placement embroidery etc. in full field of the Border frame.

Firmly fixes even thick materials.

Auto Clamp Frame

Embroidery on wide range of materials from roll fabric to finished goods is available without frame exchange.

Add more originality to pockets!

Pocket Frame

This frame allows embroidery on pockets of shirts and so on. Applicable on a side of caps as well.

Devices

One of the most popular optional item

High speed sequin device

Automatically trims sequin spangle belts in various forms and offers you stable fixing stitches at the highest speed 1,000 rpm in the industry.

Show up your embroidery to appeal your products!

High speed cording device

New variations of looping or cording embroidery can be added to a design by switching between 2 kinds of attachments.

Easy to install. Add more value to you products!

Boring device

This device bores a fabric and oversews hem of the hole.
